SKILLS

Programming Language: Python
Frontend: HTML/CSS,
JavaScript, Bootstrap, React Js
Backend: Flask
Database: MySQL
Tools : GitHub

PROJECT

Verifiable Cloud Data Deduplication Scheme with Integrity and Deduplication Proof

- Developed a secure and verifiable cloud data deduplication system to eliminate redundant data .
- Implemented cryptographic techniques and convergent encryption to ensure data integrity.
- Integrated third-party auditing to prevent unauthorized duplication and enhance trust in cloud service providers.

Quiz Application | HTML, CSS, JavaScript (frontend logic)

- Developed a responsive quiz application with separate admin and user login.
- Built an admin panel to add, edit, and delete quiz questions.
- Implemented timer-based quizzes and result visualization using charts.
- Used localStorage for frontend authentication and state management.

Secure Digital Diary with Mood Detection | Python, Flask, MySQL

- Developed a secure digital diary with user authentication.
 - Implemented CRUD operations for managing entries.
 - Built a rule-based mood detection system using conditional logic.
 - Integrated MySQL database using SQLAlchemy ORM.
-

CERTIFICATION

- AWS Cloud Practitioner Essentials
 - Prompt Engineering for GenAI
 - MongoDB
 - Data Analytics Foundations
 - Data Analytics - Extending and Applying Core knowledge
-

CAREER OBJECTIVE

Python developer with hands-on experience in full-stack web development , seeking a role where I can build responsive applications. Practical exposure through internship and industry simulations with Tata and Deloitte.

EDUCATION

Master of Computer Applications

Arcot Sri Mahalakshmi Women's Institute of Management and Computer Applications | 2025 - 2027

Bachelor of Computer Applications

Arcot Sri Mahalakshmi Women's College | 2022 - 2025

EXPERIENCE

Python Intern

Pemchip Infotech | May 2026- June 2026

Worked on machine learning projects using Python and Google Colab, processing CSV datasets and performing data preprocessing and feature engineering with Label Encoding and StandardScaler. Implemented SVM and Random Forest models, generated model files, and developed a simple user interface for project demonstration while applying machine learning and data processing concepts.

EXTRA-CURRICULAR ACTIVITIES

GenAI Powered Data Analytics Job Simulation

Tata(via Forage) | June 2025

Completed a self-paced virtual job simulation by Tata(via Forage) focused on applying Generative AI and Data Analytics to real-world business problems. Gained hands-on experience in exploratory data analytics, AI-based delinquency prediction, and data storytelling for business decision-making.

Data Analytics Job Simulation

Deloitte(via Forage) | April 2026

Completed a Deloitte job simulation focused on data analysis and forensic technology, created an interactive dashboard using Tableau, and utilized Excel to classify data, analyze trends, and derive business insights from datasets.

ACHIEVEMENTS

Secured 1st place in **Debugging** Competition , showcasing strong **problem-solving skills** | 2026
